- Date: July 2021 till present day
- Position: Editorial core committee member.
- Duties: Writing captions, mails, fiscal reports, national reports, etc. for the chapter.

## Projects (Major / Minor)

### Minor Project - November 23, 2021- Introduction to data analysis using Microsoft Excel

- In this project, I learned the foundation of data analysis with Microsoft Excel using sales data from a sample company. I learn how to use sorting and filtering tools to reorganize data and access specific information about your data. I also learned about the use of functions like IF and VLOOKUP functions to create new data and relate data from different tables. Finally, I learned how to create PivotTables to summarize and look at comparisons within the data.

### Minor Project - November 26, 2021- Charts and dashboards using Microsoft Excel

- In this project, I learned how to create charts in Microsoft Excel to analyze sales data of a sample company. I learned how to create PivotTables to assess different aspects of the sales information, and represent the information from the tables as line, bar, and pie charts. When creating the charts, I learned how to format them so they are easily interpreted and you will then assemble the charts in a dashboard to provide a global picture of the sales data.

### Minor Project - March 3, 2022- Create your UI/UX Portfolio with GitHub

- In this project, I learned to create a portfolio showcasing my UI/UX projects and deploy it to GitHub. Creating a strong portfolio showcases not only my skills as a designer, but also their perseverance to learn some new skills outside the typical purview of a designer (in this case, coding languages HTML and CSS, and Microsoft's Visual Studio Code).
